# NITESH CHAUDHARI

Java Full Stack Developer | Core Java · Spring Boot · Hibernate

Ahmedabad, Gujarat | niteshchaudhari3570@gmail.com | +91 9409189559 | linkedin.com/in/Nitesh-Chaudhari | github.com/nitesh5034

## PROFILE

BCA graduate with strong, project-tested skills in Java backend development — Core Java, Spring Boot, Spring MVC, Hibernate, and MySQL — including designing REST APIs, authentication, and admin modules. Currently pursuing frontend development (HTML, CSS, JavaScript) to grow into a complete full stack role. Quick learner with a strong foundation in OOP and MVC principles and a passion for enterprise Java development.

## SKILLS

- Backend (Proficient): Core Java (OOPs), Advanced Java, Spring Framework, Spring Boot, Hibernate (ORM)
- Web Technologies: JSP, Servlets, REST APIs
- Frontend (Pursuing): HTML, CSS, JavaScript
- Database: MySQL, SQL Server, JDBC
- Tools & IDE: Eclipse IDE, Apache Tomcat, Maven, Git, GitHub
- AI Tools: Claude AI, ChatGPT, Google Gemini — used for code debugging, logic building, and development assistance
- Core Concepts: OOP, MVC Architecture, Exception Handling, Collections Framework

## PROJECTS

**Online Job Portal System** *Academic Project*

*Tech: Core Java, Spring Boot, Spring MVC, Hibernate, JSP, Servlets, HTML, CSS, MySQL*

- Built a full-stack Java web application for job seekers and employers with complete CRUD functionality across user and admin modules.
- Migrated the original JSP/Servlets architecture to Spring Boot and Spring MVC, replacing manual JDBC calls with Hibernate ORM for cleaner data access and easier maintenance.
- User Module: registration, login/logout with session management, profile updates, and job applications.
- Admin Module: manage job listings, view applicants, approve/reject applications, and manage users.
- Implemented filter-based job search by category, location, and designation.
- Applied secure password handling, server-side form validation, and prepared statements/HQL to prevent SQL injection.

**Business Consulting Firm Management System** *Academic Project*

*Tech: Core Java, Spring Boot, Spring MVC, Spring Security, Hibernate, MySQL*

- Built a Spring Boot based management system for a consulting firm to handle clients, consultants, and ongoing projects/cases from a central dashboard.
- Implemented role-based access control (Admin, Consultant, Client) using Spring Security for secure, module-level access.
- Designed modules for client onboarding, consultant assignment, project/case tracking, and appointment scheduling.
- Used Hibernate ORM with MySQL for data persistence and built REST APIs for communication between modules.
- Built an admin dashboard to monitor active projects, consultant workload, and billing status.

## TRAINING / COURSEWORK

**Full Stack Java Development — TOPS Technologies Pvt. Ltd.** *Ongoing*

- Backend (Completed): Core Java (OOP principles), Advanced Java (JSP, Servlets, JDBC), Spring Framework (IoC, DI, Spring MVC), Spring Boot, and Hibernate ORM (HQL, session/transaction management).

- Practiced MySQL queries, stored procedures, joins, and database design for real-world use cases.
- Frontend (In Progress): currently learning HTML, CSS, and JavaScript to build toward a complete full stack skill set.
- AI-Assisted Learning: used Claude AI, ChatGPT, and Google Gemini for code debugging, concept understanding, and accelerating the development workflow.

## EDUCATION

**Bachelor of Computer Applications (BCA)** *2022 – 2025*

*Hemchandracharya North Gujarat University*
