PROFILE:

Motivated BCA graduate seeking a Core Java / Java Developer Trainee role. Strong knowledge of Core Java, OOPS, JSP, Servlets, JDBC, Spring Framework, Spring Boot, and Hibernate. Hands-on experience building full-featured web applications with admin panels, user authentication, and database integration. Familiar with AI tools like Claude, ChatGPT, and Gemini for development assistance and productivity. Quick learner with passion for enterprise Java development.

EDUCATION:

- **Hemchandracharya North Gujarat University**
- **Bachelor of Computer Applications (BCA)**
  - 2022 – 2025

SKILLS:

- **Programming:** C, C++, Core Java (OOPS), Advance Java
- **Framework:** Spring Framework, Spring Boot, Hibernate (ORM)
- **Web Technology:** JSP, Servlets, HTML, CSS
- **Database:** MySQL, SQL Server, JDBC
- **Tools & IDE:** Eclipse IDE, Apache Tomcat, Maven, Git, GitHub
- **AI Tools:** Claude AI, ChatGPT, Google Gemini — used for code debugging, logic building, and development assistance
- **Concepts:** OOP, MVC Architecture, REST API basics, Exception Handling, Collections Framework

PROJECT:

1) Title: Online Job Portal System (Completed Academic Project)

- Developed a complete Java-based web application for job seekers and employers with full CRUD functionality.
- **User Module:** Registration, Login/Logout with session management, profile update, and job application feature.
- **Admin Module:** Admin panel to manage job listings, view applicants, approve/reject applications, and manage users.
- **Job Search:** Filter-based job search by category, location, and designation.
- Implemented secure password handling, form validation, and prepared statements to prevent SQL injection.
- **Tech:** Core Java, JSP, Servlets, HTML, CSS, MySQL
- **Tools:** Eclipse IDE, Apache Tomcat, MySQL Workbench

2) Title: Online Shopping System (Academic Project)

- Built a web-based e-commerce application with user login, product browsing, cart management, and order placement.
- Designed database schema for products, users, orders, and cart with proper relational mapping.
- Implemented admin panel for product and order management.
- **Technology Used:** ASP.NET, C#, SQL Server

TRAINING / COURSE SECTION:

TOPS TECHNOLOGIES PVT. LIMITED – Full Stack Java Development (Ongoing)

- Completed Core Java with strong focus on OOPS principles — Inheritance, Polymorphism, Abstraction, Encapsulation.
- Learned Advanced Java: JSP, Servlets, JDBC — built database-connected web applications step by step.
- Studied Spring Framework (IoC, Dependency Injection, Spring MVC) and Spring Boot for rapid application development.
- Practiced Hibernate ORM for object-relational mapping, HQL queries, and session/transaction management.
- Worked on MySQL queries, stored procedures, joins, and database design for real-world use cases.
- **AI-Assisted Learning:** Used Claude AI, ChatGPT, and Google Gemini for code debugging, concept understanding, and accelerating development workflow.
